

NEW WORKSHOP: Soil Health, Fertility, & Conservation

Wednesday, October 30th at 4:00pm
Rutgers Gardens Student Farm
(130 Log Cabin Road, New Brunswick)

**Open to current and
prospective organic producers
and aspiring growers!**

**Scan the QR code to
visit the
Student Farm's
webpage for more
info & to register for
the workshop!**

Soil and its stewardship must be at the center of any farm management and production plan. Kimberly Dalton (NRCS Soil Conservationist), Joseph Heckman (Rutgers Extension Specialist in Soil Fertility), and Alex Sawatzky (Assistant Director: Sustainable Agriculture & Urban Farms) will discuss practices and systems that prioritize soil in organic farming. Kimberly will also give an overview of the programs offered by NRCS that provide technical and financial assistance to farmers.
